

<i>Smokes while burning</i>	Insufficient draught	- Open temporarily the flue damper control.
		<input checked="" type="checkbox"/> - Consult a chimney specialist.
		<input checked="" type="checkbox"/> - Check that the flue is not obstructed, sweep it if necessary,
	Down draught	<input checked="" type="checkbox"/> - Install an anti-down draught cowl
	Room is in decompression	- In houses equipped with mechanical ventilation, an outside air intake must be installed for the chimney.
<i>Low heat output</i>	Poor quality wood	- Use the recommended fuel
	Poor mixing of the convection air	<input checked="" type="checkbox"/> - Check the air flow system (air inlet, piping, air outlet)
		<input checked="" type="checkbox"/> - Check that the next rooms are equipped with ventilation grids to help out the hot air circulation

4. Spare parts

For any order of spare parts, please indicate : model nr, code of the colour, description of the part, code number and colour index of the part.

Exemple : Insert fire, model : 634 07 37, indice de couleur Y, porte 331105 ED.

A = 634 07 37 B = 634 07 38
